

1. Introduction:

Bender token is a cryptocurrency named after the popular animated character from the TV series Futurama. The Bender token aims to offer a new type of decentralized finance (DeFi) ecosystem, which combines the benefits of yield farming, liquidity provision, and community governance.

The primary goal of the Bender token project is to create a sustainable and profitable platform for investors and traders while ensuring the long-term success and stability of the project. To achieve this, the Bender token ecosystem will offer several unique features and benefits. One of the key features of the Bender token is its burn mechanism, which helps to reduce the supply of tokens over time, increasing their scarcity and value. This is accomplished with reflections being sent to the burn wallet on every buy and sell. The team will also buy and burn tokens to help reduce the supply.

Bender will offer a “Bender Swap” designed to be fast, efficient, and user-friendly, providing users with a fast, secure and reliable way to trade cryptocurrencies. It will also offer “The Bender Trender Bot”, this will be a buy bot with multiple options like competitions, such as big buy, last buy, and raffle, and one of the obvious features will be a Bender Token Trender! For the most trending tokens being used by the bot, it will also show liquidity and things such as trading volume and price movements. The team will also create a NFT collection that ties in with “The Bender Trender Bot” by offering discounts and incentives for the trending bot when the NFT is owned. The Bender NFT collection will consist of a series of unique digital collectibles featuring Bender in various outfits, items, and backgrounds. Each NFT rarity will be tied to a specific benefit or incentive for “The Bender Trender Bot”, such as a discount on subscription fees, exclusive access to premium features, or early access to new content.

In addition, the Bender token ecosystem will be governed by a decentralized autonomous organization (DAO), which will allow users to vote on important decisions related to the project's development, such as fee structures, tokenomics, and new features. Overall, the Bender token aims to provide a fun and exciting way for investors and traders to participate in the growing DeFi ecosystem, while also offering a new level of community involvement and governance.

The Bender token is a BEP-20 standard token that operates on the Binance Smart Chain (BSC) blockchain. The token is designed to leverage the benefits of the BSC blockchain, such as its fast confirmation times, low transaction fees, and interoperability with other blockchain networks. By operating on BSC, Bender token can provide a seamless user experience and ensure that transactions are processed quickly and efficiently.

2. Tokenomics:

- Token standard: BEP-20 on the Binance Smart Chain (BSC) blockchain
- Token symbol: BENDER
- Total supply: 100,000,000 tokens
- Initial circulating supply: 100,000,000 tokens (100% of the total supply)
- Token utility: The Bender token will have various use cases within the Bender ecosystem, such as:
 - Payment method for accessing premium features of the Bender trending bot
 - Staking and governance rights within the Bender DAO
 - Liquidity provision for the Bender token liquidity pool

The Bender token will have a deflationary mechanism that will reduce the total supply over time, creating a scarcity effect and increasing the token's value. The deflationary mechanism will be achieved through a token burn mechanism that will permanently remove a portion of the tokens from circulation.

Overall, the Bender token was launched through a fair and transparent distribution process and will have a deflationary mechanism that aims to increase the token's value over time. The token will have various use cases within the Bender ecosystem and will be governed by a decentralized autonomous organization (DAO) for community governance and decision-making.

3. Taxes:

At of this moment there is an 8% tax on the Bender token, with 5% going towards marketing and development and 3% going towards reflections to holders.

Additionally, it's worth noting that the Bender token team is committed to reducing the tax rate over time. As the project evolves, we aim to lower the tax rate until it reaches 0%, which will make it easier for the token to be listed on exchanges and traded freely.

4. Roadmap:

1. Q2 2023: Token Launch/Listing and BENDER Swap

The Bender token launched through a fair and transparent distribution process that allows users to acquire tokens at a fair market price without any pre-sale or private sale allocations. The token was listed on the popular decentralized exchange, PancakeSwap, to ensure liquidity and accessibility. “Bender Swap” designed to be fast, efficient, and user-friendly, providing users with a fast, secure and reliable way to trade cryptocurrencies.

2. Q3 2023: Bender Trending Bot Launch

The Bender Trending Bot will be launched, allowing users to access multiple options like competitions, raffles, and trending, it will also show liquidity and things such as trading volume and price movements.

3. Q3 2023: NFT Collection Launch

The Bender token ecosystem will launch an NFT collection that ties in with the Bender Trending Bot and offers discounts and incentives for the bot when the NFT is owned.

4. Q4 2023: DAO Governance and Community Participation

The Bender token ecosystem will be governed by a decentralized autonomous organization (DAO), allowing users to vote on important decisions related to the project's development, such as fee structures, tokenomics, and new features. The Bender token DAO will also introduce incentives for community participation, such as voting rewards.

5. Q1 2024: Ecosystem Development and Partnerships

The Bender token ecosystem will focus on expanding its reach and partnerships within the broader cryptocurrency and blockchain industry. This will include collaborations with other blockchain projects, marketing campaigns, and strategic partnerships to increase adoption and awareness of the Bender token and ecosystem.

6. Q2 2024: Mobile App and Wallet Integration

The Bender token ecosystem will introduce a mobile app and wallet integration, allowing users to access the Bender token and ecosystem from their mobile devices. This will include a seamless user experience, enhanced security, and additional features.

Overall, the Bender token roadmap focuses on building a comprehensive ecosystem that provides real-time market insights, community participation, and incentives for users to hold and use the Bender token. The project aims to leverage the benefits of the Binance Smart Chain (BSC) blockchain to provide fast and efficient transactions and a seamless user experience.

5. Disclaimer:
